To many of us, a spiritual path is our way of trying to figure out the meaning of life, a way to reach a deeper understanding of oneself amid all the chaos and pain that life has brought on to us. Working on finding the light within? Is there a universal principle that can help us see the same goodness in all of us despite our differences? Can a life with peace and happiness be attainable and sustainable?

There will be a **Q&A** session at the end of Khenpo's presentation. We invite you to join us and be part of this conversation. No registration is necessary.
